Does My Pet Need an Essential Care Plan?

Absolutely. From the time your pet is a puppy or kitten to his or her most senior years, providing your pet with annual preventive healthcare is the very best gift you can give them. Keeping your pet on an Essential Care Plan helps prevent diseases, and because our plans include two annual preventive care exams and diagnostic testing, if your pet does get sick it will be detected early on, which results in faster, more effective treatment.

Our Essential Care Plans are designed to provide the most comprehensive wellness care your pet needs at every stage of their life. Our plans include comprehensive examinations, vaccines and the proactive diagnostics your pet needs from the time they are a puppy or kitten through their senior years.

ESSENTIAL CARE PLANS

Helping to Ensure Your Pet
Enjoys a Long and Healthy Life

THEY GROW UP SO FAST

Pets are members of the family, and they grow up so fast. In fact, pets age 5-7 years for each human year. By 6 months your new puppy or kitten is the equivalent of a 3 year old, which is why an Essential Care Plan that includes all of the examinations and preventive medicine your pet needs on an annual basis is vital to helping them live a long and happy life.

WHAT IS AN ESSENTIAL CARE PLAN?

An Essential Care Plan is an annual package of services that includes the optimal preventive health care services that your pet needs to stay happy and healthy. Our plans are based on the age and the specific needs of each individual pet. Our veterinarians will recommend the plan that is best for your pet based on age and other relevant factors.

Budgeting for Your Pet's Health Care

The beauty of our Essential Care Plans is that they provide pet owners with peace of mind, because they can be confident they are providing the ultimate in preventive medicine for their beloved pet, but the cost of care can be spread out over 12 months. The ability to make small automated monthly payments allows pet owners to fit this care into their budget.

And Essential Care Plan members also enjoy a 10% discount on additional services that are not covered under the plan, as well as a 10% discount on the purchase of a twelve month supply of heartworm, flea & tick preventative medications. It is just one more way we make it easy for pet owners to provide the highest quality healthcare for their pets.
